Applied economist focusing on causal inference. Current research activities encompass: looking at the effects of air pollution on human well-being, studying the intersection between digitalization and environmental degradation, and analyzing pathways for the decarbonization of the energy sector.

📁 Work Experience

Dates	Position	Institution	Country	Activities
Sep.2022 -	Junior Scientist	RFF-CMCC: European Institute on Economics and the Environment		Scientific support to institutional activities. Mentoring of junior scholars. Applied econometrics and the development of agent-based models. Study the relationship between transport, digitalization, and the environment as part of the EU 2D4D project.
Sep.2020 Sep.2022	Postdoc Researcher	RFF-CMCC: European Institute on Economics and the Environment		Study the relationship between the transportation sector, digitalization, and the environment. Applied econometric projects on air pollution, air pollution control policies, and natural disasters. Scientific support to institutional projects.
Apr.2017 Sep.2020	Research Associate	DIW-Berlin: German Institute of Economic Research		Research and publication of scientific articles in the realm of energy and environmental economics. Research projects on the effects of air pollution and air pollution control policies on productivity, health, and wellbeing.
Nov.2019 Aug.2020	Research Associate	Hertie School of Governance		Study the relationship between daylight savings and transit patterns.
Sep.2012 Sep.2015	Business Executive	Banco del Bajío SA		Financial advice to small and medium-sized companies

🎓 Education

Dates	Degree	Institution	Country	Dissertation
Apr.2017 Aug.2020	Doctor in Economics (Summa Cum Laude)	Berlin Institute of Technology		An Econometric Analysis of Environmental Phenomena
Sep.2014 Apr.2016	Master of Science in Economics and Management	Humboldt University of Berlin		Electricity Production from Renewable Sources in Mexico: A Time Series Analysis
Aug.2007 Aug.2012	Bachelor of International Business	University of Lasalle Bajío		A Project of Foreign Direct Investment between Mexico and Colombia

📖 Research Interests

Applied Econometrics	Use of econometric methods for causal inference
Digitalization and the Environment	Analysis of the inter-dependencies between the transportation sector, digitalization, and the environment
Energy Modeling	Design and Implementation of optimization models to assess public policies for the decarbonization of energy systems
Agent Based Models	Design and implementation of agent-based models to understand households' adoption of green technologies

A2 Softwares and Languages

R (R-Studio)		English	
Quarto		Spanish
